

Care to Share

We have a new program that I am sure you have heard about from your hygienist, called **Care to Share**.

We would really appreciate it if all of our loyal patients would ask their friends, family, co-workers, etc. to be a patient at our office. When you do and they come in for a new patient initial exam you will get a **\$25.00 credit** to your account. Also the patient you invited to our office will also receive a **\$25.00 credit** on their account.

Referrals are the best form of compliment. Thank you all.

Happy New Year

We hope that all of our wonderful patients had a great 2008. We would like to welcome 2009 with a BANG!!!

We have new technology and services we would like to share.

CEREC
Chairside
Economical
Restorations
of Esthetic
Ceramic

We are so excited about our new CEREC machine. This technology is state of the art in dentistry. CEREC is changing the way of restorative dentistry. A large number of our patients have had one of these wonderful crowns, completed in just one appointment.

CEREC advanced dental restorative system allows us to restore decayed teeth, place crowns, remove defective amalgam fillings, or place cosmetic veneers,

In Just One Appointment!

This technology has a track record of over 20 years, and more than 100 studies confirmed the clinical excellence of the method.

We are so excited to offer this wonderful technology to all of our patients.

What's New with the Staff?

We have a couple of changes:

Kelly has been accepted to dental hygiene school and is very excited! We are all so happy for her. **Good luck, Kelly!**

Ask Ingrid about her expanding family. Her daughter Kari had twin boys born in August. She loves to rave about them. She is a wonderful grandma.

We have a new employee at the front desk. Her name is Tracy. Please welcome her to the office the next time you are in.

Our web site is finally up and running. We are so excited for all of our patients to visit our web site.

Bleaching

As dental professionals we try to keep up with the most current studies and information pertaining to services our patients use the most. One of the most often used and requested services is bleaching. We have researched and decided the most cost effective and time saving method of bleaching is in office bleaching. It takes about one hour and it lasts up to two years (in most cases longer) So if you long for that bright white smile, please give us a call so we can make that happen.

Co-Discovery

We have had our intra-oral cameras in the rooms for awhile now, and they are a wonderful tool for your hygienist.

We will be using the intra-oral camera every time you get your teeth cleaned so we can have co-discovery.

This means you and your hygienist can explore your teeth and gums together so you are able to see and better understand the condition of your mouth.

We believe the best patient is an informed and educated patient.
